

An Introduction to Agile with SCRUM

- So What's behind Agile?
 - Teamwork
 - Quality
 - Delivering value early
 - Customer collaboration
 - Responding to change
- Scrum in 100 words
 - Agile process that allows us to focus on delivering the highest value in the shortest time
 - Allows us to rapidly and repeatedly inspect actual working software (every two weeks to a month)
 - Business sets priorities. Teams self-organise to determine best way to deliver highest priority features
 - Every sprint anyone can see real working software and decide to release it as is or continue to enhance it for another sprint
- Scrum framework
 - Roles
 - Product owner
 - ScrumMaster
 - Team
 - Ceremonies
 - Sprint planning
 - Sprint review
 - Sprint retrospective
 - Daily scrum meeting
 - Artifacts
 - Product backlog

- Sprint backlog
- Burndown charts
- Daily Scrum Meeting
 - Everyone answers these 3 questions:
 - 1) What did you do yesterday?
 - 2) What will you do today?
 - 3) Is anything in your way?
 - Start / Stop / Continue
 - whole team gathers and decides what to:
 - Start doing
 - Continue doing
 - Stop doing
